

WTC | 3

The background of the slide features a series of parallel diagonal stripes. The stripes are in shades of dark blue and a metallic gold color, creating a sense of depth and movement. The stripes are wider and more prominent in the lower half of the image, tapering off towards the top.

## WTC 3: THE NEW BENCHMARK FOR BUSINESS AND PLEASURE

Leaders are defined by their results – which constantly exceed expectations. In adopting a more sustainable way forward, WTC 3 represents the pinnacle of Jakarta Land's signature quality, improving life beyond buildings and work spaces. This premium Grade A office tower offers the latest in technology, facilities and retail options, to exceed the demands of its tenants. At WTC 3, it is time to take the lead with confidence.

WTC 3 is a new office development at a landmark address – The World Trade Centre complex. The complex embraces a growing portfolio of premium office buildings and facilities that stand out for their differences. WTC 3 is the next chapter in the history of the WTC complex, continuing the mission of building the best, as each new tower sets new standards of performance and sustainability.

WTC 3 is at the heart of the financial district in Jakarta. When complete in 2018 it will become one of the tallest skyscrapers in the capital, boasting 70,000 square metres of rentable office floor space and lifestyle locations.

## THE HIGHEST STANDARDS, BUILT UPON THE SOLID VALUES OF JAKARTA LAND

Jakarta Land was founded in 1973. Jointly owned by Central Cipta Murdaya (CCM) and Hongkong Land, two experienced and dependable Asian property companies with a successful track record of partnerships and projects throughout the region.

Jakarta Land unites more than 100 years of global experience and capability of Hongkong Land, with the local knowledge and insights of CCM.

The World Trade Centre complex, more than 40 years in-the-making, is the zenith of this partnership, a long-term commitment to first class security and property management, superior infrastructure and a program of continual upgrades and improvement to the fabric and facilities of the complex.

In setting such high standards, WTC has attracted and retained some of the most successful global multinationals, enduring anchor tenants in a world class property that is both safe and comfortable.

## A WELL KNOWN STRATEGIC AND HIGHLY VALUED LOCATION

WTC 3 is located within the highly sought after WTC complex, strategically fronting onto Jalan Jenderal Sudirman, the principal thoroughfare of the Golden Triangle and Jakarta's central business district. Surrounded by road and foot access on three sides, the WTC site benefits from multiple entry points which greatly facilitate vehicular and pedestrian traffic flow. When operational, the upcoming MRT station will feed into WTC's main entrance, further enhancing the transport links of the 8 hectare site.

As a prime location with Jakarta's downtown, the immediate vicinity of the site is also home to 5-star hotels and other landmark office towers. WTC 3 is close to the Indonesia Stock Exchange and the Semanggi flyover for easy access to the airport toll road and Jalan Gatot Subroto, the major east-west artery that runs through the city centre. Several large shopping malls are within 10 minutes' drive of the complex.

## OUR LOCATION

## WORLD CLASS ARCHITECTURE, ADAPTED TO THE LOCAL VALUES

WTC 3 is designed by Aedas, one of the world's leading global architecture and design practices, who previously designed WTC 2. With a global presence, commitment to cutting edge research and development and belief that good design can only be delivered by people with a deep social and cultural understanding of the communities they are designing for, Aedas is committed to deliver design excellence to clients, wherever they are in the world.

## HARMONY IN TECHNOLOGY AND ENVIRONMENTAL PRIORITIES

Built to advanced environmental standards for optimal energy efficiency, the new 42-floor tower will be accredited to the BCA Green Mark standard. The architectural approach seeks sensitivity and context to the four existing buildings in the WTC complex, while maintaining a remarkable presence as the most sought after commercial tower in Jakarta CBD. WTC 3 is designed for tenants seeking office space that is both technologically superior and more sustainable than any other in Jakarta.

WTC 3 is a state-of-the-art premium office tower that stands out for its distinctive design, green construction and quality of materials. With an innovative double glazed curtain wall system that incorporates low-emission glass, the tropical heat is kept outside while the cool air is contained within. With a total of 5 basement levels, 4-storey retail podium and 70,000 square metres of office space, once completed in 2018, the building will be home to 8,000 people.

## PUTTING SECURITY ON THE HIGHEST PRIORITY, EVERYDAY

WTC 3 will add to WTC's reputation for tight, integrated multilayer security management. The integrity of the complex is protected by an outer security ring manned by professional security guards with CCTV-monitored security checkpoints. Within WTC 3 itself, access is controlled by further security personnel, pass-activated turnstiles and unobtrusive CCTV cameras monitored 24/7 from the building's own security office.

As with the four other buildings within the WTC complex, WTC 3 will have its own separate access control – restricting access to the ground floor lift lobby to tenants and metal-detection screened visitors.

WTC 3 will incorporate a fully automated, state-of-the-art building management system that will constantly monitor the building, optimising cooling and lighting for maximum operational functionality and energy efficiency.

## SELF SUSTAINING AND CONSTANTLY IMPROVING MANAGEMENT SERVICE

Office buildings should be much more than just places of work. People populate them and so the facilities and amenities on offer should reflect the lifestyles of our tenants. When WTC 3 is complete, nearly 20,000 people and staff will work at the complex every day.

As responsible property managers, we empower and investing in our own team of caring and attentive professionals, dedicated to delivering high standards and, through our 24/7 Tenant Service Centre, customer service excellence.

Although our buildings are designed to be highly resilient, flexible, and adaptive to the needs of our tenants, we are committed to a rolling programme of upgrades to critical equipment and the fabric of all our buildings. Our philosophy is to maintain all equipment at the highest state of readiness and so all critical systems are monitored round-the-clock in our high-tech building management offices. Continual investment in facilities throughout the complex allows us to optimise operational efficiency and better manage our burgeoning portfolio.

## AMENITIES THAT MATCH YOUR BUSINESS STANDARDS AND LIFESTYLE

At the end of a successful day in the office, it is good to be able to unwind before facing the traffic and the journey home. The new 4-storey lifestyle space within WTC 3 offers enticement from the street, catering to a variety of tastes and lifestyle needs. Whether with colleagues or friends, you are sure to find a favourite amongst the many food, beverage, and retail options.

## THE FLEXIBILITY TO BUILD AND GROW YOUR BUSINESS

Column-free, 2,000 square metres floors provide design flexibility for original layouts. Whether single or multi-tenanted, the absence of columns across the huge floor plate removes physical obstacles to design possibilities. Larger tenants need less space on fewer floors; improving space efficiency and delivering a potential cost-saving. Built by Jakarta Land and designed by the internationally-acclaimed architects Aedas, WTC 3 is a building designed with the end-user in mind.
